

## Spiropent and Clenbuterol, are the same?

Spiropent is a brand name for the chemical Clenbuterol Hydrochloride or Clenbuterol HCL.

Spiropent is very expensive and is not one bit better or worse than any other Clenbuterol manufacturer.

In fact, there are many brand names for Clenbuterol Hydrochloride HCL. Here is a list:

Broncodil, Broncoterol, Cesbron, Clenasma, Clenbuter, Pharmachim, Contrasmina, Contraspasmina, Monores, Nihfi, Novegam, Oxyflux, Prontovent, Spiropent, Ventolase, Ventapulmin etc.

### TIPS TO SUCCESS WITH CLENBUTEROL:

Clenbuterol was first discovered and made popular by athletes, body builders and weightlifters,

now Clenbuterol is becoming popular with just about anyone who wants to loose weight.

But will the tablets alone make you lose weight? Most people do not understand how to use Clenbuterol, so we have compiled this page of simple tips!

- 1) Take Clenbuterol in the morning not in the evening, the reasons for this are mixed and varied from making sure you get a good nights sleep to making sure you have a day filled with energy and also making sure that you lose that fat!
- 2) Three week using Clenbuterol, then stop for three weeks.
- 3) Exercise DAILY, Clenbuterol helps you help yourself! it is not some magic wonder pill that just makes you skinny, the day they release that magic pill we will ALL look like Brad Pitt/Angelena Jolie. While you are not taking Clenbuterol for 3 weeks you can recude the amount of training/exercise, but while you are taking Clenbuterol it is vital you exercise daily.
- 4) Start on a low dose, finish on a low lose! this is important.
- 5) Eat healthy and drink lots of water, but at least keep your eating habits better than Pizza, McDonalds and Burger King.
- 6) Do not weigh yourself daily, weigh yourself weekly or eve after a 3 week cycle! like they say a watched kettle never boils.
